Virginia Uniform Crime Reporting Program

DEPARTMENT OF STATE POLICE

Lt. Col. W. F. Corvello
Acting Superintendent

RICHMOND

Foreword

Crime is of great concern to all citizens of Virginia. By use of crime statistics, criminal justice agencies can make an informed decision concerning their most efficient and effective manner in which to dedicate their limited resources toward the reduction of crime in their communities. The UCR Program is a system of collecting and analyzing crime statistics gathered on selected crimes by participating law enforcement agencies throughout the State. We acknowledge the efforts made by these agencies in making this report accurate and concise.

The population totals for this publication are 1988 provisional estimates provided by the Center for Public Service, University of Virginia. They are the most accurate figures available for use in the Commonwealth. The Center cooperates with the U.S. Bureau of the Census to prepare these annual population estimates, which are the state's official estimates for Virginia localities. This represents a change from the old policy of using projected figures, which tend to become inaccurate as the decade moves from the census year. Variance in the crime rate figures for 1989 may be reflected in this change.

In accordance with the Code of Virginia, the Department of State Police, as the central repository, collects UCR information from participating agencies; the most accurate information available in Virginia is used to generate the statistics contained in this publication. UCR statistics were originally for police agencies only, but community concern has generated a use by both public and private sources. This use increases yearly. The UCR information has become the primary vehicle used to evaluate levels of criminal activity in jurisdictions throughout Virginia.

The participation and cooperation of all agencies making this publication possible is sincerely appreciated. The quality of the program continues to be maintained through their cooperative efforts.

Lieutenant Colonel W. F. Corvello
Acting Superintendent

Dedication

This publication is dedicated to the memory of the following law enforcement officers who were feloniously killed while performing their duties during 1989.

Trooper Jerry Lynn Hines

Virginia State Police
October 15, 1940 - February 20, 1989
Employed November 1, 1966

Corporal Charles William Hill

Alexandria Police Department
February 22, 1949 - March 22, 1989
Employed August 2, 1978

Deputy Paul Edward Grubb

Henry County Sheriff's Office
March 4, 1948 - July 2, 1989
Employed April 1, 1980

Facts At A Glance

Offenses

- There were 256,802 serious crimes (index offenses) reported. 27.8 percent of these offenses were cleared. (Page 104)
- The crime rate for the State of Virginia was established at 4269.29 Part I Offenses for every 100,000 inhabitants. (Page 104)
- 391,503 arrests were made in the State. 9.9 percent of these involved persons under 18. (Page 69)
- The value of property stolen amounted to \$222,597,613. 44.4 percent was recovered. (Page 58)
- The theft of jewelry and precious metals accounted for a substantial value of property loss, amounting to \$18,878,636. (Page 60)
- Firearms were used in 66.9 percent of all Murder/Nonnegligent Manslaughter cases reported. All other weapons made up an additional 33.1 percent. (Page 14)
- 10,451 Aggravated Assaults were reported. Of these 30.9 percent were committed by the use of hands, fists, or feet. (Page 24)
- Residential Burglaries accounted for 64.0 percent of all burglaries reported. 34.7 percent of these were committed at night. (Page 27)
- 18,951 Motor Vehicle Thefts were reported, amounting to a total value loss of \$111,911,694. (Page 34)

LAW ENFORCEMENT OFFICERS KILLED AND ASSAULTED

- Three law enforcement officers were feloniously killed in the line of duty. (Page 54)
- There were 1,808 assaults on officers reported. 97.7 percent were cleared. (Page 54)

Virginia Uniform Crime Reporting Program

HISTORY

Development of the current nationwide Uniform Crime Reporting Program began sixty years ago. In 1930, crime counts were first requested from local police departments, with the Federal Bureau of Investigation designated by Congress to collect, compile, and analyze these statistics. The Committee on Uniform Crime Records of the International Association of Chiefs of Police played a primary role in the origin and development of the UCR Program and, to this day, serves in a strong advisory capacity. The National Sheriff's Association (NSA) in 1966, established a Committee on Uniform Crime Reporting to serve in an advisory capacity to the NSA membership and the national Uniform Crime Reporting Program. Today, this Committee and similar committees within the state law enforcement associations are active in promoting interest in the UCR Program. Standardized offense classifications and scoring procedures to insure uniformity and consistency of data are the keynote of the reports. All of the Uniform Crime Reports were designed to be a by-product of information that a law enforcement agency should routinely compile for its own efficient administration and performance. The underlying philosophy and focus is and always has been oriented toward police statistics for use by law enforcement agencies, but the unique nature of the program makes the data invaluable for use by elected officials and the American public.

In recent years, the FBI has actively assisted individual states in the development of statewide programs of police statistics compatible with the national system. These state statistical programs provide the advantage of increased coverage of law enforcement agencies due to mandatory reporting requirements. State systems also provide direct and frequent service to law enforcement agencies in assuring completeness and quality of information provided by them. Through coordination by the state collection agency, the data is available for use by the state, and the collection and reporting machinery for the national program is substantially streamlined.

Prior to June 30, 1974, no mandatory uniform crime reporting law existed in Virginia, and of the 288 agencies in the Commonwealth, 162 or 56% were voluntarily reporting directly to the Federal Bureau of Investigation. Effective law enforcement requires the coordinated action of all law enforcement agencies within and among political subdivisions. Special attention must often be devoted to a selective and concentrated effort both area wide as well as in terms of a specific pattern and type of criminal behavior. Selective and coordinated enforcement becomes possible only when the type and volume of crime can be analyzed on a basis of accurate information, statistically developed and coordinated. A system of this magnitude necessitates the use of a computer-based information processing system.

The need for statistical information on the number of offenses and offenders was long recognized in the state. The system developed in Virginia gives vital information that assists law enforcement agencies throughout the state by furnishing information for management decisions and planning programs.

A statewide UCR program informs the Governor, Legislature, local and state law enforcement agencies, other governmental officials, and the public as to the nature of crime problems in Virginia, their magnitude, and their trend over a period of time. Local and state officials are able to assess the direction and impact of crime through the collection of timely and reliable statistical information.

UCR SYSTEM OBJECTIVES

In keeping with a recommendation of the President's Commission on Law Enforcement and the Administration of Justice, the Virginia Uniform Crime Reporting Program was planned for eventual growth into a complete and integrated offender based Criminal Justice Information System. Under this program, each offender arrested in Virginia will be tracked through the entire criminal justice system from the time of arrest through the courts, and to the correctional system where his exit (parole, expiration of sentence, etc.) will be recorded. In this manner, a complete "rap sheet" on individual offenders will be available for use by the police, courts and correctional agencies in Virginia. In addition, statistical data derived from the CJIS Program will provide assistance in determining the overall efficiency of the criminal justice system in Virginia and will make effective management studies possible.

The fundamental objectives of the Virginia Uniform Crime Reporting Program are:

- (1) To inform the Governor, Legislature, and other governmental officials, and the public as to the nature of the crime problem in Virginia—its magnitude and its trend.
- (2) To provide law enforcement administrators with criminal statistics for administrative and operational use.
- (3) To determine who commits crimes by age, sex, race, and other attributes in order to find the proper focus for crime prevention and enforcement.
- (4) To provide base data and statistics to measure the workload and effectiveness of Virginia's criminal justice system.
- (5) To provide base data and statistics to measure the effects of prevention and deterrence programs.

- (6) To provide base data and statistics for research to improve the efficiency effectiveness and performance of criminal justice agencies.
- (7) To provide base data to assist in the assessment of social and other causes for the development of theories of criminal behavior.

REPORTING PROCEDURES

In the statewide Uniform Crime Reporting Program, contributing law enforcement agencies are responsible for compiling their own crime reports and submitting them to the State Police UCR Section. The State Police, in an effort to maintain quality and uniformity in the data received, furnish full-time field representatives who provide training in Uniform Crime Reporting procedures. All contributors are furnished with the UCR Guide Manual which outlines in detail procedures for scoring and classifying offenses. The manual illustrates and discusses the monthly and annual reporting forms as well as the numerous tally sheets made available to facilitate the periodic tabulation of desired data.

A centralized record system is necessary to the sound operation of any law enforcement agency. The record system is an essential basis for crime reporting by the agency. Upon request, the State Police will make internal records, forms, and technical assistance available to any law enforcement agency. This provides for the establishment or modification of a basic non-automated police records system.

On a monthly basis, law enforcement agencies (state, county and municipal) report the number of offenses that become known to them during the month in the following crime categories: murder and nonnegligent manslaughter, manslaughter by negligence, forcible rape, robbery, aggravated assault, burglary, larceny, motor vehicle theft and arson. This count is taken from a record of all complaints of crime received by the law enforcement agency from victims, other sources and/or discovered by officers. Whenever complaints of crime are determined through investigation to be unfounded or false, they are eliminated from the actual count. The number of "actual offenses known" in these crime categories is reported to the State Police UCR Section without regard to (1) whether anyone is arrested for the crime; (2) the stolen property is recovered; (3) the local prosecutive policy; or (4) any other restrictive consideration. Law enforcement agencies on a monthly basis report the total number of these reported crimes which they clear either by arrest or exceptional means. A separated count of crimes cleared involving persons under the age of 18 is shown. The number of law enforcement officers killed and assaulted and the value of property stolen and recovered during the month are reported. Arrests are reported for all criminal acts, except traffic violations, by crime categories including the age, sex, and race of each person arrested. Supplementary information concerning pertinent data surrounding homicides is reported.

Law enforcement employee data concerning the number of sworn and other personnel is collected annually.

VERIFICATION PROCEDURES

An obvious concern in the collection of crime statistics is the validity and uniformity of the data received. With the receipt of reports covering approximately 288 jurisdictions, the problems of attaining uniformity are readily apparent.

Issuance of instructions does not complete the role of the State Police UCR Section. On the contrary, standard operating procedure is to examine each incoming report not only for arithmetical accuracy but also, and possibly of even more importance, for reasonableness as a possible indication of errors.

Numerous checks and cross-checks are used to insure the accuracy of the reports. Arithmetical adjustments or unusual variations are noted by the UCR verifiers and brought to the attention of the submitting agency by direct contact or through a field representative. Upon resubmission of a corrected return, the forms are reverified.

A great deal of the success of Virginia's UCR Program is due to the full-time field staff assigned to assist local agencies in record-keeping practices and crime reporting procedures. Personal contact is invaluable to the accuracy and uniformity of UCR data received.

STATISTICAL FEEDBACK

A particularly important aim of Virginia's UCR Program is statistical "Feedback" to contributors. With the implementation of this program, participating police agencies furnish data that is analyzed and returned to each jurisdiction upon request in monthly printout form. A monthly newsletter is published containing monthly state totals. Quarterly, semi-annual and annual summaries are also furnished each agency. With the completion of the annual report, contributing agencies possess detailed information showing crime trends by jurisdiction.

Data collected is also forwarded by the Department of State Police UCR Section to the Federal Bureau of Investigation on a monthly and annual basis. This is for inclusion in national crime reports and the FBI's annual UCR Report, Crime in the United States.

Crime Factors

Crime trends vary from place to place; thus, a review of the statistics and comparison of data should be done with caution. While the causes and origins of crime have been the subject of investigation by many disciplines, *Crime in Virginia* restricts itself to population size alone to establish a crime rate.

Some factors believed to affect the type and volume of crime in various places are:

1. Population size, density and degree of urbanization;
2. Population variations in composition and stability;
3. Economic conditions and employment availability;
4. Mores, cultural conditions, education, and religious characteristics;
5. Family cohesiveness;
6. Climate, including seasonal weather conditions;
7. Effective strength of the police force;
8. Standards governing appointments to the police force;
9. Attitudes and policies of the courts, prosecutors and corrections;
10. Citizen attitudes toward crime and police;
11. The administrative and investigative efficiency of police agencies and the organization and cooperation of adjoining and overlapping police jurisdiction;
12. Crime reporting practices of citizen.

Crime Trends 1989-1988

Index Offenses	Year	Number Offenses	Percent Changed	Rate Per 100,000	Percent Cleared
Murder/Nonnegligent Manslaughter	1989	480	+ 2.6	7.98	84.0

*The Modified Crime Index Total is the sum of the Crime Index Offenses including arson.

II Crime Index Offenses

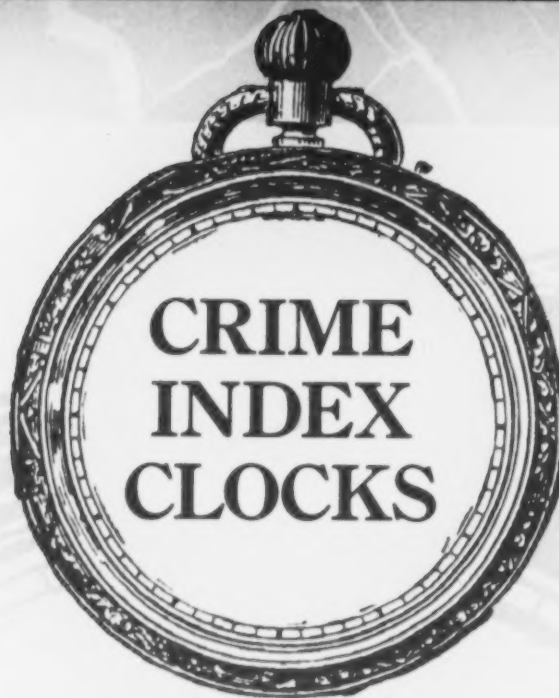

The Crime Index

For practical purposes of measuring the trend and distribution of crime on the National and State level, the Uniform Crime Reporting Program is based on a Crime Index. This index is composed of those crimes considered to represent the most local crime problem and the most serious by nature of motive or by the volume in which they occur. Essential also to the maintaining of uniform and consistent data is the establishment of standard definitions which are used for the State and National Programs.

The UCR Crime Index Offenses and their definitions, listed in order of seriousness, are:

- (1) Murder/Nonnegligent Manslaughter—The willfull (nonnegligent) killing of one human being by another.
- (2) Forcible Rape—The carnal knowledge of a female forcibly and against her will.
- (3) Robbery—A vicious crime which takes place in the presence of the victim to obtain property or anything of value by force or the threat of force.
- (4) Aggravated Assault—An unlawful attack by one person upon another for the purpose of inflicting severe bodily injury.
- (5) Burglary—The unlawful entry of a structure to commit a felony or theft.
- (6) Larceny—The unlawful taking or stealing of property or articles of value without the use of force.
- (7) Motor Vehicle Theft—The unlawful taking or stealing of a motor vehicle.

**Murder/
Nonnegligent Manslaughter**
480 offenses reported
403 offenses cleared
457 total persons arrested
.2 percent of the Crime Index total

**Murder/
Nonnegligent
Manslaughter**

Murder/Nonnegligent Manslaughter is defined in the Uniform Crime Reporting Program as the willful (Nonnegligent) killing of one human being by another. As a general rule, any death due to a fight, argument, quarrel, assault, or commission of a crime is included. Suicides, assaults to murder, and attempted murders are not included. Those deaths found through police investigation to be accidental are classified as Manslaughter by Negligence. These are not considered Crime Index Offenses and are not included in this report. Also, no data is collected through the UCR program on traffic fatalities.

In 1989, there were 480 murders reported. Of these offenses 84.0 percent were cleared. An analysis by month shows July had the greatest occurrence. Compared to 1988, there were 468 murders reported, 81.6 percent were cleared, and October had the greatest occurrence.

Murder/Nonnegligent Manslaughter

In all cases of murder reported under this system a supplementary report is submitted by participating law enforcement agencies. This report provides pertinent information including age, sex, and race of the victim, weapon used, relationship of victim to offender, and any circumstances or motives which led to the commission of the crime.

VICTIMS BY AGE, SEX, AND RACE

AGE	NUMBER	PERCENT DISTRIBUTION
Under 1	3	.6

Due to rounding, figures may not total 100%.

Murder/Nonnegligent Manslaughter

The circumstances which result in murder vary from family arguments to felonious activities. Murder/Nonnegligent manslaughter is largely a societal problem which is beyond the control of police. The relationship of the victim to the offender and the circumstances of murder serve to emphasize this point.

**Relationship of Victim
to Offender**

**Circumstances
of Murder**

Murder/Nonnegligent Manslaughter

The charts below illustrate the number and percent distribution by type of weapon used, and situation in the commission of murders in Virginia in 1989.

Type	Number	% DISTRIBUTION
Unknown gun	12	2.5
Handgun	244	50.8
Shotgun	39	8.1
Rifle	26	5.4
Knife	79	16.5
Club	16	3.3

Due to rounding, figures may not total 100%.

Forcible Rape

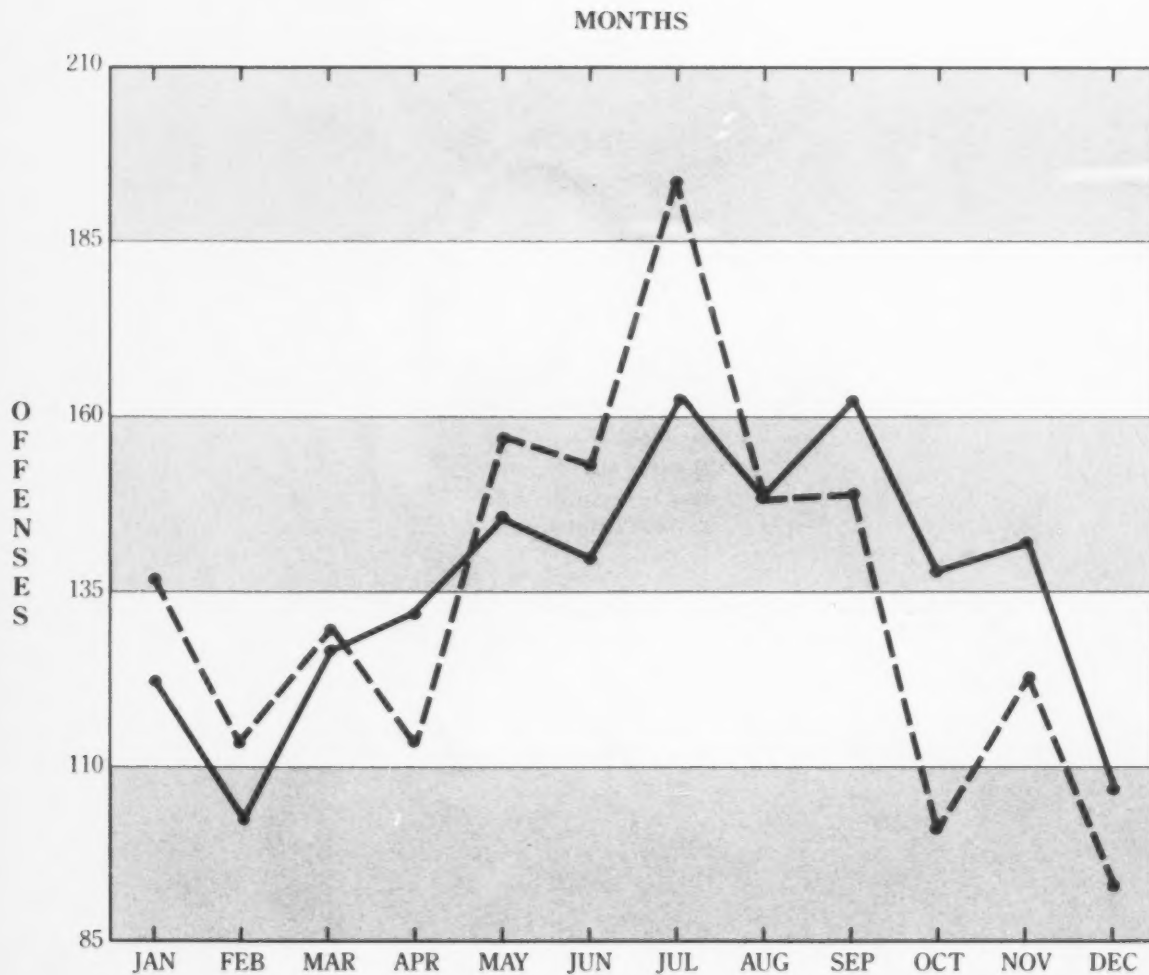

1,637 offenses reported
1,229 offenses cleared
887 total persons arrested
.6 percent of the Crime Index total

**Forcible
Rape**

Forcible Rape is defined as the carnal knowledge of a female forcibly and against her will. For UCR purposes this offense is divided into two sections: Forcible Rape and Attempted Forcible Rape. Statutory rape offenses and other sex offenses are not included in this category.

In 1989, there were 1,637 rapes reported. Of these offenses 75.1 percent were cleared. An analysis by month shows July had the greatest occurrence. Compared to 1988, there were 1,622 rapes reported, 72.3 percent were cleared, and July had the greatest occurrence.

1989 represented by solid line
1988 represented by broken line

Forcible Rape

Forcible Rape differs from other violent crimes in that the victim, in many cases, is hesitant in reporting the offense to police. The rigors of court procedure, embarrassment and fear of any accompanying stigma have a deterrent effect on the victim's willingness to make the crime known to police.

Robbery

**6,494 offenses reported
2,710 offenses cleared
1,998 total persons arrested
2.5 percent of the Crime Index total**

Robbery is defined as the felonious and forcible taking of the property of another against his will by violence or by putting him in fear. The element of personal confrontation is always present in this crime. Under the UCR Program, all assaults or attempts to rob are included. Robberies are reported in four general categories: firearms, knife or cutting instruments, strong-arm and other dangerous weapons.

In 1989, 6,494 robberies were reported. Of these offenses 41.7 percent were cleared. An analysis by month shows January had the greatest occurrence. Compared to 1988, there were 6,748 robberies reported. 41.4 percent were cleared, and December had the greatest occurrence.

Aggravated Assault

Aggravated assault is defined as the unlawful attack by one person upon another for the purpose of inflicting severe bodily injury, usually accompanied by the use of a weapon or other means to produce death or great bodily harm. Attempts are included.

In 1989, there were 10,451 aggravated assaults reported. Of these offenses 78.5 percent were cleared. An analysis by month shows August had the greatest occurrence. Compared to 1988, there were 9,102 aggravated assaults reported, 79.6 percent were cleared, and August had the greatest occurrence.

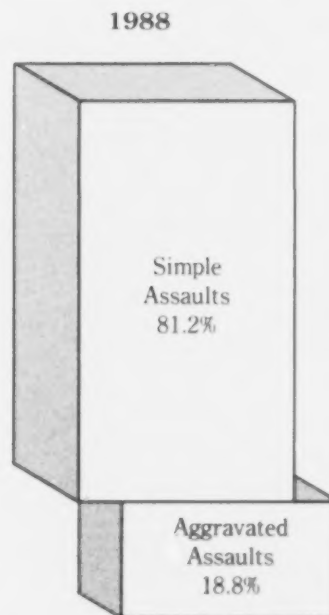

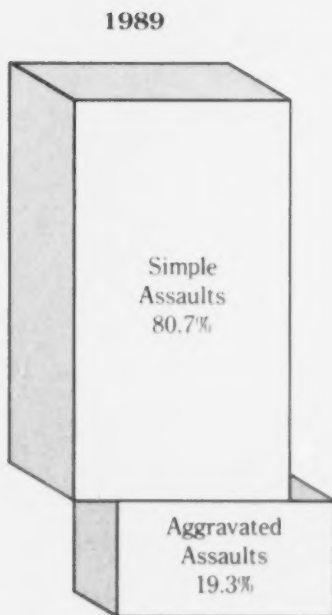

1989 represented by solid line

Aggravated Assault

For a further analysis of aggravated assault, this offense is sub-divided into five categories: gun, knife or cutting instrument, strong-arm—hands, fist, feet, etc., other dangerous weapons and other assaults not aggravated. Any assault which does not result in serious injury to the victim is classified in the latter category.

Burglary

Burglary is defined as the unlawful entry of a structure to commit a felony or theft. The use of force to gain entry is not required to classify the crime as a burglary. This offense is sub-divided into three classifications: forcible entry, unlawful entry—no force, and attempted forcible entry.

In 1989, there were 46,149 burglaries reported. Of these offenses 25.8 percent were cleared. An analysis by month shows August had the greatest occurrence. Compared to 1988, there were 49,069 burglaries reported, 24.7 percent were cleared, and August had the greatest occurrence.

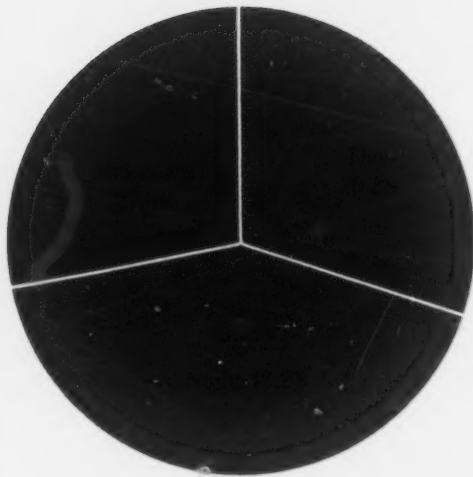

1989 represented by solid line
1988 represented by broken line

Burglary

Burglary is generally accepted as a crime of stealth and opportunity. In 1989, 75.1 percent of the burglaries involved forcible entry, 15.7 percent were unlawful entries and 9.2 percent were found to be attempted forcible entries. Economically, the offense of burglary represents a substantial sum of \$41,592,010. The average dollar loss per burglary was \$901. Compared with 1988, 75.3 percent were forcible, 15.0 percent were unlawful, and 9.8 percent were attempted forcible. The total sum was \$40,772,904 with an average dollar loss of \$831 per burglary.

67.2 percent of the Crime Index
total

Larceny

This offense is defined as the unlawful taking or stealing of property or articles of value without the use of force or violence. Motor vehicle theft is not included in this category and is counted as a separate offense. All thefts which are not considered part of robbery, burglary, or motor vehicle theft are classified in this category, regardless of the value stolen. Attempted thefts are included.

In 1989, there were 172,640 offenses of larceny reported. 23.6 percent of these offenses were cleared. The estimated dollar loss per offense was an average of \$372. Compared with 1988, there were 165,343 offenses reported. 22.5 percent were cleared with an average dollar loss of \$355. In 1989, the greatest occurrence of larceny was in the month of August. In 1988, the greatest occurrence was in August.

Larceny

The nature of larceny, a crime of opportunity, sneak thievery and petty unobserved thefts, makes it an extremely difficult offense for law enforcement officers to solve. A lack of witnesses and the volume of these crimes work in the offender's favor.

Nature of Larceny	Year	Number of Offenses	% Dist.	% Change	Total Value	Average Value

Five Year Trends and Projections

The following graphs are five year trends for the Index Crimes. The 1990 projections shown are estimates computed by a Least-Squares Linear Regression Method. The algebraic formula for linear regression ($Y = a + bx$) permits one to determine "Y" (the incidence of crime) from "b" (the relative slope) of a line. The slope of the projection line is determined such that the sum of the distances from the various points (crime incidences from prior years) to the line is at a minimum.

CRIME INDEX

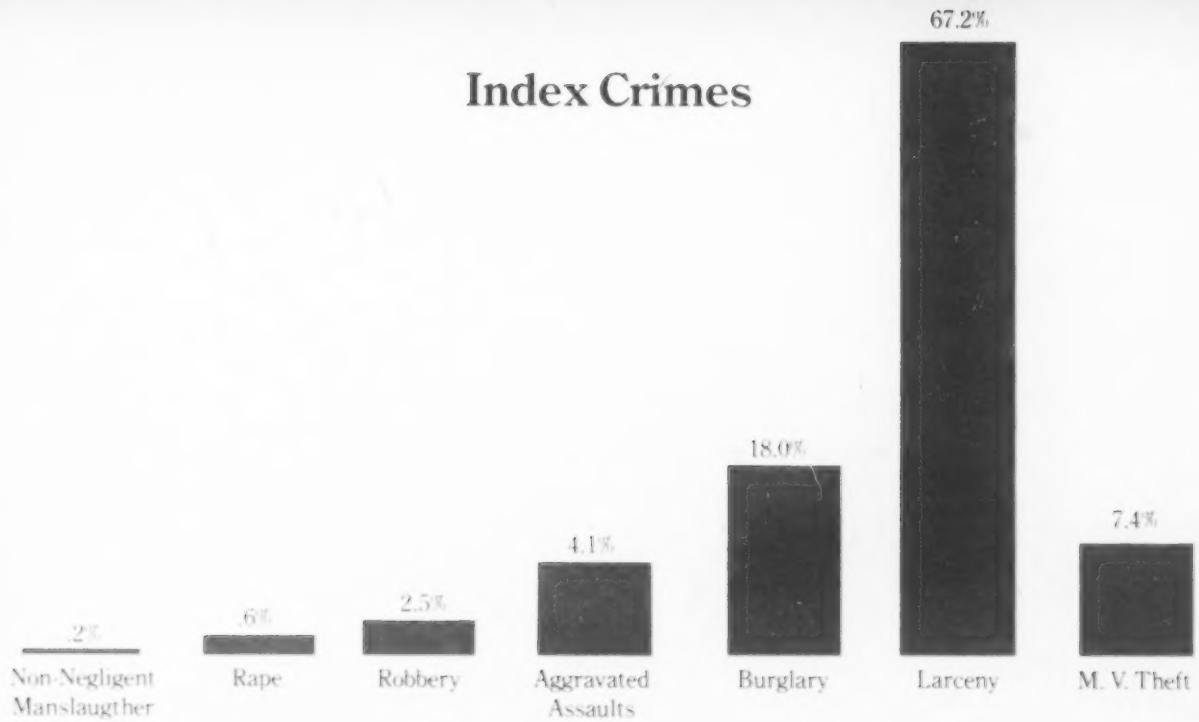

III

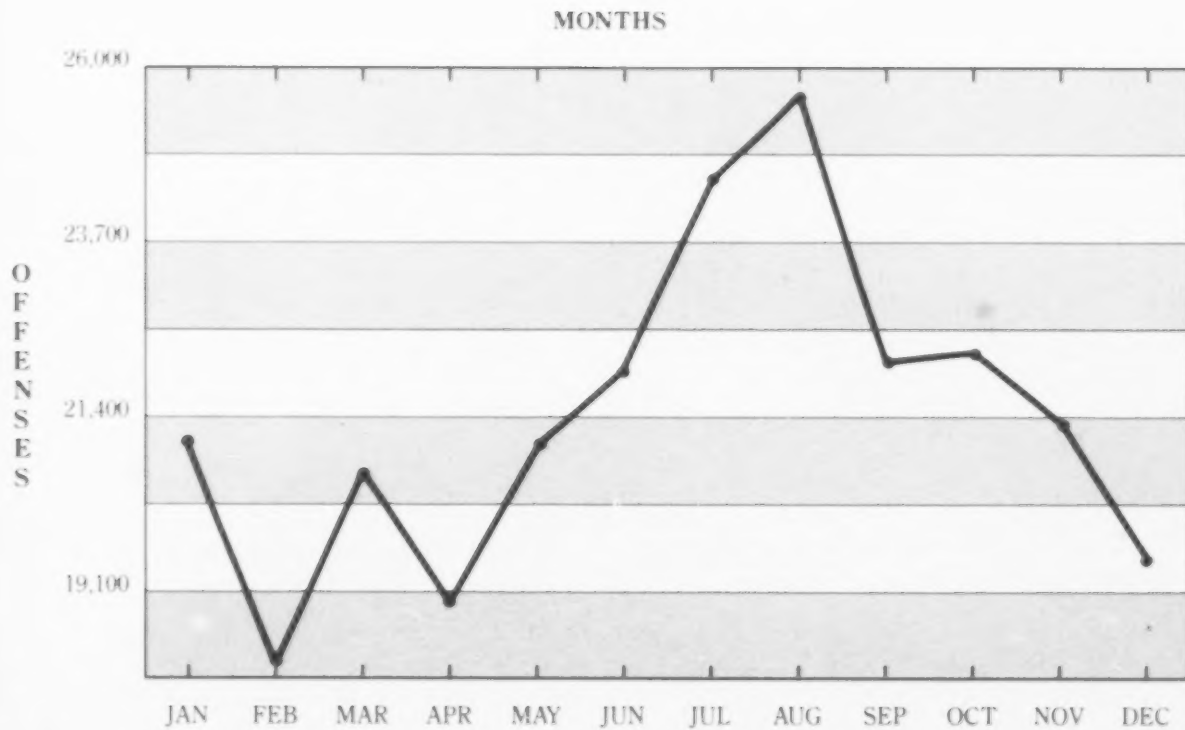

Summary of Index Offenses

Index Crimes

The measure used to indicate the probable extent, fluctuation, and distribution of crime reported through the UCR system is a Crime Index. As outlined in the introduction of this report, the Crime Index consists of the offenses of murder/nonnegligent manslaughter, forcible rape, robbery, aggravated assault, burglary, larceny, and motor vehicle theft.

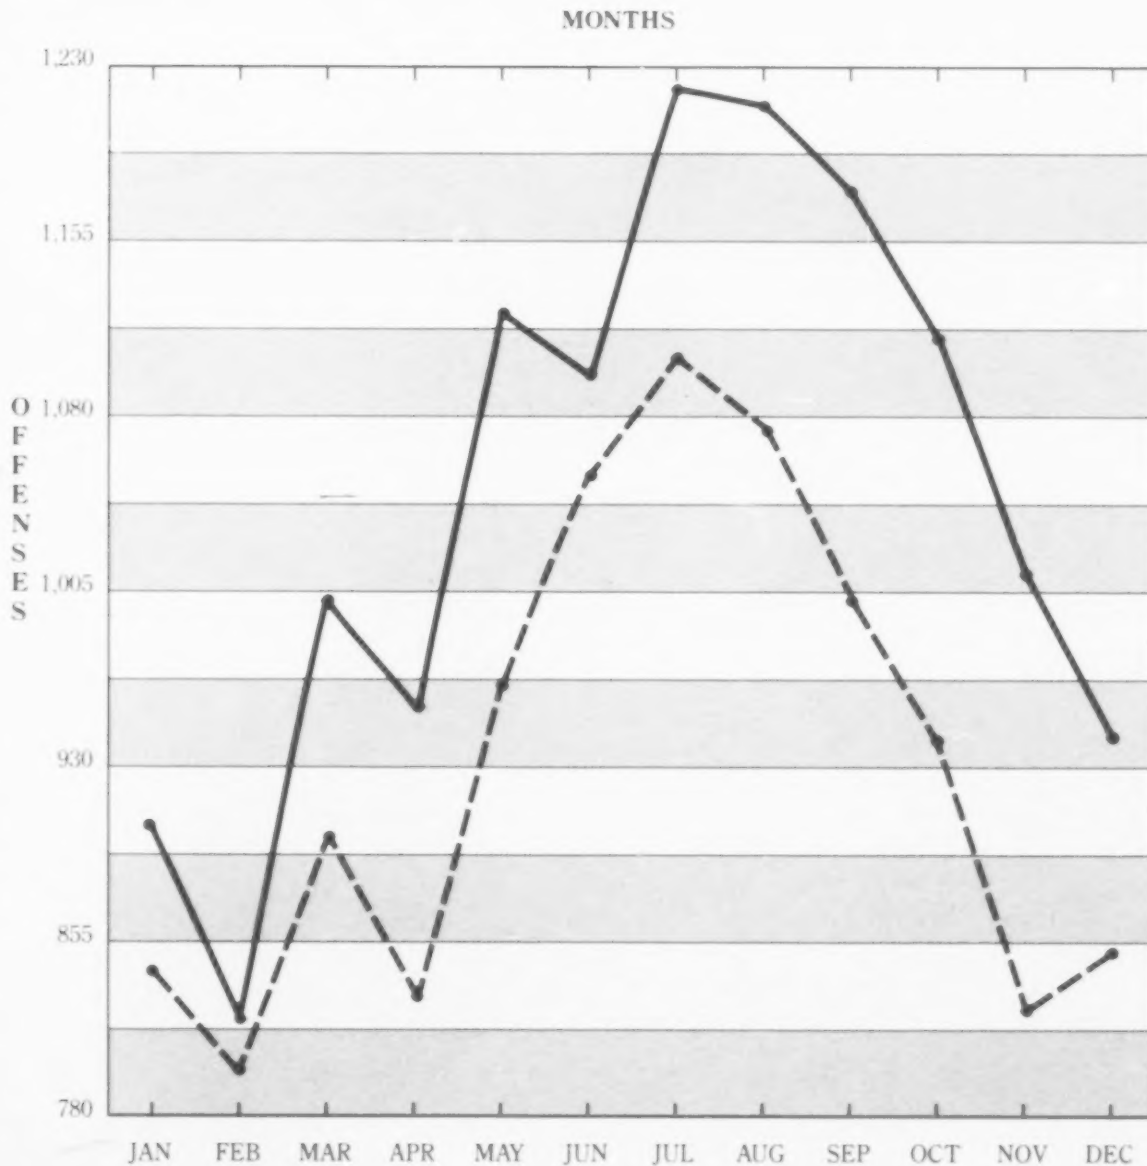

The graph below illustrates the variations and distributions of the total number of Index Crimes reported monthly.

Crimes Against The Person

Those crimes which are classified as crimes against the person are murder/nonnegligent manslaughter, forcible rape, and aggravated assault. These offenses are often considered the most violent of crimes because of the personal confrontation of the victim with the perpetrator. The classification is based entirely on the motive of the crime and any involvement of money or theft is not considered in this classification.

The graph below illustrates the number by month of crimes reported against the person in 1989 compared with the number reported in 1988.

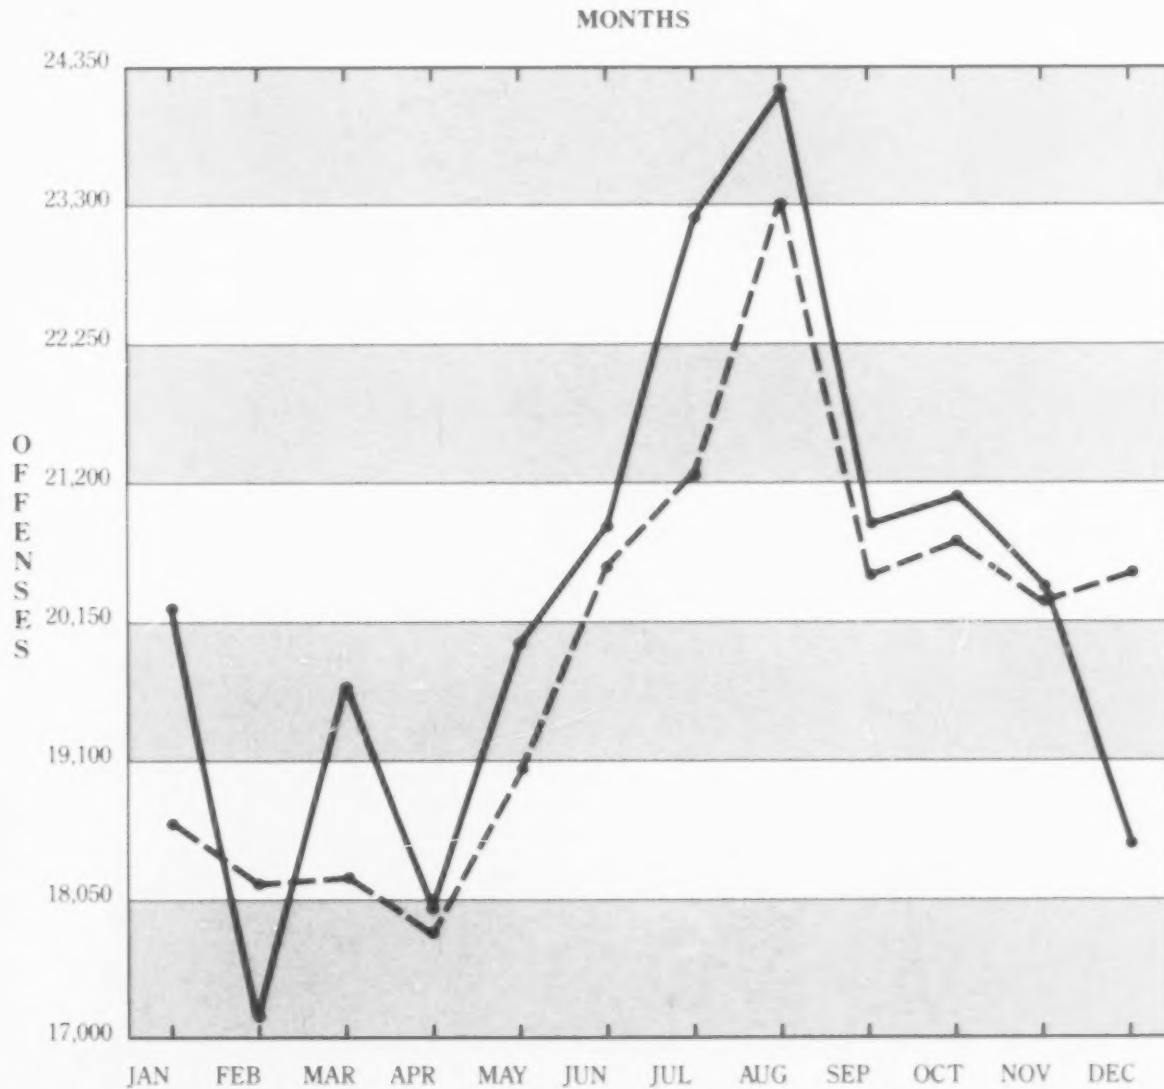

1989 represented by solid line
1988 represented by broken line

Crimes Against Property

Property crimes, under Uniform Crime Reporting, are the offenses of robbery, burglary, larceny, and motor vehicle theft. These offenses for the year of 1989 made up 95.1 percent of all reported index crimes.

Total value of property loss amounted to \$222,509,677.

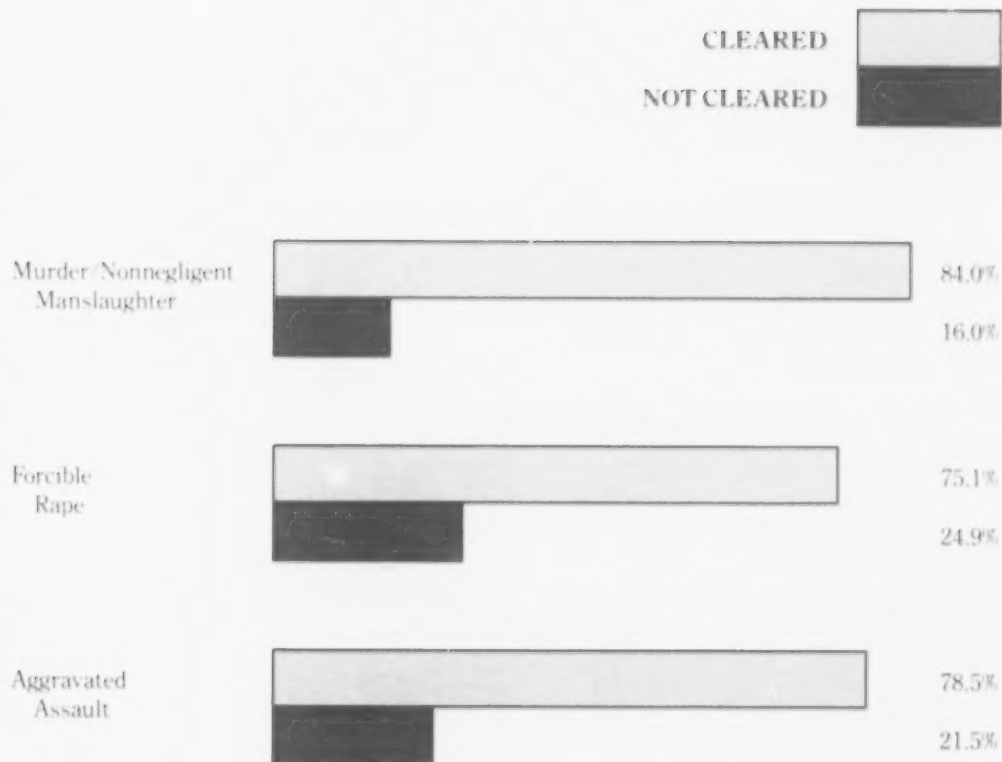

These offenses for the year of 1988 made up 95.5 percent of all reported index crimes. Total value of property loss amounted to \$206,132,512.

Clearance Rates For Index Offenses

The percentage of crimes cleared is obtained by dividing the number of offenses cleared by the number of offenses known and multiplying the results by 100.

Example:

$$\frac{55 \text{ (Robberies cleared)} \times 100}{180 \text{ (Known Robbery Offenses)}} = 30.5\%$$

The table below illustrates the clearance rates for each index crime.

Classification	Number of Offenses	Percent Distribution	Percent Cleared
Murder/Nonnegligent Manslaughter	480	.2	84.0

Calculation of Crime Rates

One of the most meaningful crime statistics used in Uniform Crime Reporting is the Crime Rate. This rate is the number of offenses per 100,000 inhabitants. This rate can be calculated regardless of the number of inhabitants in a city or county. To compute rates, divide the city's population by 100,000 and divide the number of offenses in each class by that answer. The answer is the number of offenses per 100,000 inhabitants and is your crime rate for that offense.

Example:

A. Population for jurisdiction—75,286

B. Number of Burglaries for that jurisdiction—215

Divide 75,286 by 100,000 = 0.75286

Divide 215 by 0.75286 = 285.58

The Crime Rate for Burglary in that jurisdiction is 285.58 per 100,000 inhabitants.

1989 INDEX OFFENSES CRIME RATES

IV

Law Enforcement Officers Killed and Assaulted

1989 Law Enforcement Officers *Killed and Assaulted

Through the Uniform Crime Reporting Program additional information is collected on enforcement officers assaulted and number of officers killed. Information is provided on the activities and assignment at the time of the assault, type of weapon used to commit the offense, injuries involved and time the activity took place.

During 1989, 1,808 assaults on officers were reported. 97.7 percent were cleared. During 1988, 1,742 assaults on officers were reported. 98.4 percent were cleared.

*Information pertaining to law enforcement officers killed is contained in an annual summary published by the National Uniform Crime Reporting Program.

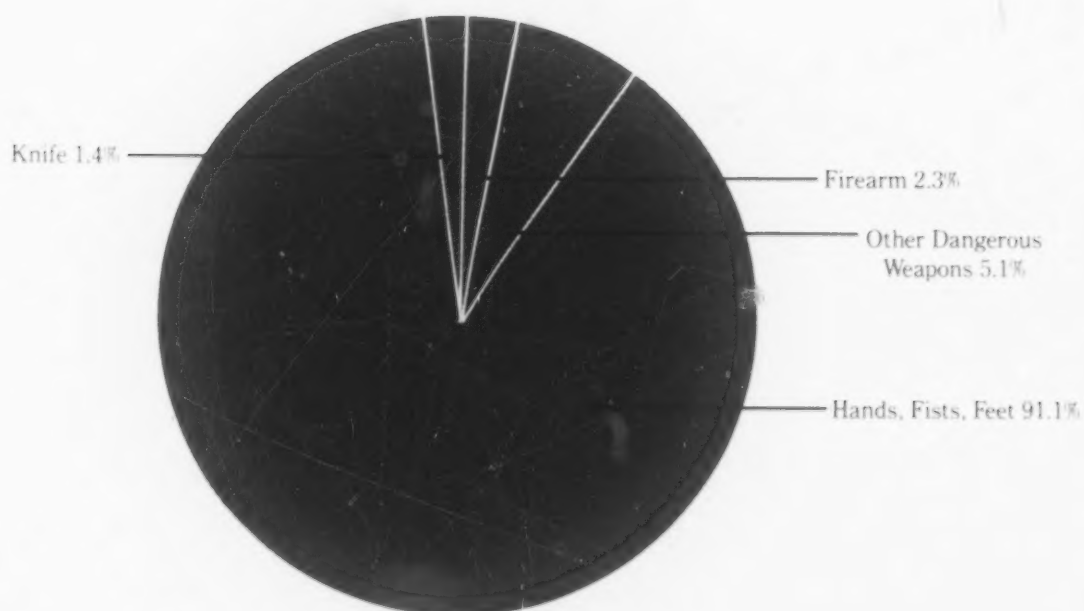

OFFICERS KILLED				
Number of Law Enforcement Officers killed in the line of duty:				
By Felonious Act		By Accident or Negligence		
1989	1988	1989	1988	
3	2	0	0	

OFFICERS ASSAULTED			
Activity	Number Assaulted	Percent Distribution	Percent Cleared
1. Responding to "Disturbance" calls (family quarrels, man with gun, etc.)	466	25.8	99.6
2. Burglaries in progress or pursuing burglary suspects	15	.8	100.0
3. Robberies in progress or pursuing robbery suspects	2	.1	100.0
4. Attempting other arrests	506	28.0	99.2
5. Civil disorder (riot, mass disobedience)	14	.8	78.6
6. Handling, transporting, custody of prisoners	222	12.3	100.0
7. Investigating suspicious persons or circumstances	121	6.7	95.0
8. Ambush — no warning	7	.4	85.7
9. Mentally deranged	38	2.1	97.4
10. Traffic pursuits and stops	174	9.6	98.3
11. All other	243	13.4	90.9
12. TOTAL	1808	100.0	97.7

Due to rounding, figures may not total 100%.

Value of
Property Stolen
and Recovered

Value of Property Stolen and Recovered

Through the assistance of participating agencies, UCR collects supplementary breakdowns for each of the crime offense categories. The resultant figures provide information concerning the value of property stolen and recovered by type of property and offense. The table below indicates the total value of property stolen and recovered, by month during 1989.

MONTH	AMOUNT STOLEN	AMOUNT RECOVERED	% REC.
JAN.	\$ 18,659,563	\$ 7,702,896	41.3
FEB.	14,461,183	5,985,297	41.4
MAR.	17,038,806	7,863,981	46.2
APR.	16,790,523	7,158,596	42.6

VI Arrest Data

1989 Arrest Data

Arrest statistics reflecting characteristics of persons arrested by age, sex, and race are collected monthly from contributing law enforcement agencies. In examining arrest figures it is important to remember they do not personally identify individuals arrested but represent the total number of persons arrested. One person may be arrested several times during a year for the same type of crime or for different offenses. Each arrest would be counted. Furthermore, arrest figures cannot be compared to offense figures because several persons could be arrested for the same offense, or the arrest of one person may solve several offenses. Arrests are primarily a measure of police activity as it relates to crime. Although law enforcement arrest policies vary, particularly with respect to juveniles, contributors to this program are instructed to count one arrest each time an individual is taken into custody for committing an offense. A juvenile is counted as a person arrested when he commits an offense and the circumstances are such if the offender were an adult, an arrest would be made. The data below compares 1989 to 1988 arrest statistics.

1989 ARREST DATA

Month	Number Arrested

Arrest Data By Age

Under the Uniform Crime Reporting Program information is collected monthly on statewide total arrests. This information provides pertinent data on the age, sex, and race of persons arrested for both Part I and Part II offenses. Arrest information is collected in two categories: Adult Arrest — Age 18 and Over and Juveniles Arrested — Under Age 18.

Police Disposition of Juveniles Arrested

Through monthly reporting forms, the Uniform Crime Reporting Program collects information on the disposition of juveniles arrested for any Part I or Part II offense. In certain instances, juveniles are referred to the probation department or other branch of juvenile court. In other cases, referral is made to welfare agencies, to other police agencies, or in the case of serious offenders, to criminal or adult court by waiver of the juvenile court.

Disposition	Number	Percent Distribution
Handled within the Department and (Released to parents, etc.)	12571	33.0
Referred to Juvenile Court Juvenile Authorities or Probation Department	25250	66.1
Referred to Welfare Agency	115	.3
Referred to Other Police Agency	127	.3
Referred to Criminal or Adult Courts	117	.3

Incident Based Reporting

IBR/UCR

THE PRESENT UCR SYSTEM IN VIRGINIA

Although the Uniform Crime Reporting (UCR) program started in the United States in 1930, Virginia did not implement this program until July 1, 1974.

The present system of reporting crime to UCR is called Summary Based Reporting. Eight crimes are used to form the crime index, which is controlled by the hierarchy rule. This rule states that when multiple offenses occur at the same time, only the most serious offense is reported, and the others are ignored. Under this concept, murder/non-negligent manslaughter is ranked first in the hierarchy while motor vehicle theft is ranked seventh. Consequently, if a person is murdered and his/her car is stolen during the same incident, the murder would be reported to UCR and the motor vehicle theft would go unreported. The summary system does not collect any details concerning the offenses, other than the number of crimes occurring.

The present UCR system collecting information relating to two different levels of offenses; the most serious offenses are classified as Part I offenses, and the less serious offenses are categorized as Part II offenses. The offenses classified as Part I are crimes which have historically been the events most frequently reported to law enforcement agencies: murder, forcible rape, robbery, aggravated assault, burglary, larceny-theft, and motor vehicle theft. Arson was added as a permanent Part I offense in 1982.

There are 20 categories of offenses classified as Part II offenses, and only arrest data is reported.

Although several police departments may have been involved in the investigation, only one agency may report a crime. Consequently, it is important to remember that UCR is used to depict the type and *number of crimes reported* in a particular community and *not the number of cases handled*.

Since the UCR program was implemented sixty years ago, it has remained fundamentally unchanged except for a steadily increasing number of contributing agencies. While the UCR summary data have been widely used by law enforcement agencies, researchers, government policy makers, and the media, the same sources have also criticized the program. Many question the accuracy of the data since UCR statistics appear to disagree with those published in related sources; however, the form of the UCR data prevents meaningful comparisons. Data processing capabilities of large police and sheriffs' agencies have outpaced the antiquated methods of the program. The system needs to be expanded to cover a wider range of offense types and provide more detailed information on the nature of criminal activity. The Incident Based Reporting System will meet this demand for a more comprehensive reporting system.

THE INCIDENT BASED REPORTING SYSTEM

The Incident Based Reporting (IBR) system is designed to meet law enforcement needs well into the next century. The following information is furnished to provide an overall description of IBR.

During the preliminary development of IBR by the Federal Bureau of Investigation, advice was solicited from the National Association of State UCR programs, the International Association of Chiefs of Police, the National Sheriffs' Association, the National Alliance of State Drug Enforcement Agencies and other federal, state and local criminal justice agencies.

The guidelines and specifications developed were provided to South Carolina for testing in a pilot program in 1987. As a result of the testing, further refinements were made. In 1988, a national conference was held to present these guidelines and obtain feedback from representatives of law enforcement agencies in attendance. While the consensus was that the Federal Bureau of Investigation should proceed with efforts to implement this system nationally, additional suggestions concerning this program were submitted.

Virginia formed a State UCR Committee in 1986 to follow the developments of the IBR and to evaluate its impact on our state. This committee was composed of representatives from the Virginia State Sheriffs' Association, the Virginia Association of Chiefs of Police, the Department of Criminal Justice Services, and the Department of State Police. The State UCR Committee created the UCR Forms Subcommittee, which included representatives from police and sheriffs' agencies, the State Police, and the Department of Criminal Justice Services. This subcommittee developed, tested and subsequently recommended a standard Incident Based Reporting form for use in Virginia. The Forms Subcommittee recommended this form be used at the option of the reporting agencies when the IBR program is adopted. However, agencies may use their own form to report the required data to the central repository. It is important, at this point, to recognize that this form will be used to *collect* the various data concerning criminal activity. Because of the numerous data elements collected, law enforcement agencies will *report* this data to the central repository via an automated system.

The UCR Committee recommended that the Superintendent of the Department of State Police adopt the minimum, mandatory data standards recommended by FBI/UCR and proceed with the implementation of Incident Based Reporting in Virginia. In addition, the committee recommended that the data be collected which would relate the offender to the offense, the type of property security/alarm system used, and the method/direction used by the offender to flee the scene. Additional data will be collected on Officer Assaulted/Killed Reports relating to the types of activities and assignments the officer was performing at the time of the offense.

The form suggested by the UCR Forms Subcommittee is provided for your review. The mandatory information required by the IBR is shown in the shaded area. Agencies may wish to expand this process to facilitate collection of data to serve the needs of their individual agency and/or community.

Some of the major benefits to be derived from the IBR system are greater specificity in reporting; more correlation between offenses, property, victims, offenders, and arrestees; expanded victim/offender relationships; distinction between attempted and completed crimes; and increased reporting of various circumstances relative to specific crimes.

The IBR system will require that extensive data be reported for *each crime* occurring during a particular incident. Currently, only limited data concerning the *most serious crime* occurring during a particular incident is reported via UCR.

Information relating to two different levels of offenses will be collected by the IBR system. The most serious offenses will be designated as Group "A" offenses; the less serious offenses will be designated as Group "B" offenses. Group "A" offenses consist of 22 different crimes involving 46 different offenses; a maximum of 10 offenses per incident may be reported. Agencies will be required to report 75 data elements for each Group "A" offense. Group "B" offenses, consisting of 11 crimes, will simply require reporting arrest data and the identification of the case and reporting agency.

Since IBR requires the reporting of numerous data elements, an automated system is essential for its implementation. In consideration of the costs for automation, the future of IBR is dependent upon the budgetary process. We anticipate it will take approximately six years to fully implement IBR *after* receiving funding; the transition from Summary Based Reporting to Incident Based Reporting should be completed in the late 1990s. Consequently, agencies should consider funding for the IBR system in their future budgets.
